

# Revere Shutters

"Built with quality...knowledgeable  
and communicated very well."  
-Rick C.

Southern Crafted Shutters' Revere shutter material is enhanced with zinc borate and produced using phenolic resins, ensuring it is resistant to moisture, rot, and termites. This product supports green building initiatives in the industry, as the panels are crafted from sustainable resources. The material itself is made up of 90% wood sourced from recycled byproducts of other processes rather than from old-growth timber, thus reducing waste in the production.
